Turnaround (processing) time:

Testing takes up to ten working days for most tests/services as long as the sample yields a good result on the first try. Typically they do so.

Please note that batches finish on different days, so you may receive the report for one dog more than once as various tests are completed and added to the document. Once you have received all results for a dog, you are welcome to contact us for explanations if needed.

Exceptions to the ten working days turnaround are as follows:

Dilated Cardiomyopathy (Doberman Pinscher) – around four weeks

Profile and Parentage – around two weeks or around four weeks depending upon breed (call for more information)

Breed Testing – around four weeks
